Summary

Aspiring Full Stack Developer with hands-on experience in React Native, JavaScript, Node.js and Python. Passionate about building responsive applications, REST APIs and user-focused software solutions.

Education

KIT's College of Engineering, Kolhapur 2023–2027
B.Tech Computer Science and Business Systems *CGPA: 8.22(till 5 sem)*

Sanjay Ghodawat International School 2022–2023
CBSE Class XII *84.25%*

Sanjay Ghodawat International School 2020–2021
CBSE Class X *91%*

Projects

QuickForm ERP System | ***React Native, Google Apps Script, Google Sheets, Google Drive***

- Developed an ERP application for educational institutes to streamline student management, field visits, document uploads, and administrative workflows.
- **Key Contributions:** Designed the application logo and onboarding screens, developed the student-side interface, and created responsive UI components for an intuitive user experience.

GridPilot – Smart Bus Management System | ***HTML, CSS, JavaScript, Python***

- Developed a smart bus management platform that provides route information, bus tracking, and commuter updates using data-driven insights.
- **Key Contributions:** Integrated CSV datasets using Python for backend processing and contributed to designing and developing the application's homepage interface.

SafeLink – Women Safety Application | ***React Native, Node.js, Express.js, SQLite***

- Built a women safety application with secure authentication, emergency support, and live location sharing between parents and children.
- **Key Contributions:** Developed the parent-side login module and implemented the functionality to display the child's live location on an interactive map.

Technical Skills

Languages: Java, JavaScript, Python, HTML5, CSS3
Frontend: React.js, React Native
Backend: Node.js, Express.js, REST APIs
Database: SQLite, MySQL (Basics)
Tools: Git, GitHub, VS Code
